EDUC16: 
EDUCATIONAL PSYCHOLOGY

Fall Term, 2014  Professor David J.M. Kraemer, PhD 
2A: Tuesday, Thursday @ 2:00-3:50  david.kraemer@dartmouth.edu 
x-period: Wednesday @ 4:15-5:05  Office hours: Tu,Th @ 4:00-5:30 
Kemeny 108  Office: Raven House 212

COURSE DESCRIPTION
This course challenges students to think critically about the relationship between what we know about the mind from experimental research in the lab and how we teach students to learn in classrooms. The main focus is on reading empirical articles and reviews of research that highlight the major concepts and theories from Psychology and Neuroscience that have bearing on Education. We will discuss the relationship between learning and such topics as working memory, reinforcement, semantic knowledge, experience and practice, and what should be the role of neuroscience research in informing educational practice.

The main goals of this course are to:
- Become proficient at reading empirical research articles in experimental psychology, neuroscience, and education
- Become familiar with the major concepts and theoretical models from psychology and neuroscience that relate to education
- Become adept at evaluating the merit of claims from proposed educational interventions (and from the media) regarding neuroscience or psychology concepts

COURSE REQUIREMENTS
- All readings will be available on Canvas and you are required to read the assigned papers before class.
- In-class discussion of assigned readings is a critical component of this course and will be facilitated by bringing the printed articles to class for your reference.
- Developing the skills of critically reading empirical research articles and writing for a scientific audience are central to achieving the course goals.

GRADING OVERVIEW
20%  Midterm Exam
20%  Final Exam
15%  Quizzes: 6 total (drop lowest)
15%  Research Paper
15%  Group Presentation
13%  Class Participation and Attendance
2%  Research Participation (or alternative assignment)
GENERAL POLICIES

1. **Read all materials and prepare for class.** You are expected to read the materials posted on Blackboard **before** each class. Be prepared to discuss that material **in class.** Everyone is expected to come to every class and to arrive on time. You are also expected to contribute to class discussion. You will learn the material better and others will learn from you. The success of this course depends on everyone coming to class prepared and ready to discuss the material. Both attendance (on-time) and preparation for class will determine a portion of your grade (see “Assignments and Assessments” below).

2. **Tell me sooner rather than later.** If you know ahead of time that you will be missing a class, e.g., for sports, please let me know in advance in order to avoid losing participation credit. Some students may wish to take part in religious observances that occur during this academic term. If you have a religious observance that conflicts with your participation in the course, please meet with me before the end of the second week of the term to discuss appropriate accommodations.

3. **ASSUME THAT I WILL NOT ACCEPT LATE ASSIGNMENTS.**

4. **Cell phones are not to be used in class.** If an emergency arises that requires the use of a phone, please quietly excuse yourself from the room to respond.

5. **Accommodations.** Students with learning, physical, or psychiatric disabilities enrolled in this course who may need disability-related classroom accommodations are encouraged to make an office appointment to see me early in the semester (i.e., within the first two weeks). If you have not done so already, students requiring disability-related accommodations should register with the Student Accessibility Services office (301 Collis Student Center). Dartmouth’s policies and resources: [http://www.dartmouth.edu/~accessibility](http://www.dartmouth.edu/~accessibility)

   Contact info: 646-9900, **Student.Accessibility.Services@Dartmouth.edu**

6. **Plagiarism is unacceptable.** All work submitted as your own must be written by you and not previously submitted for any other class. It is important to attribute material that is the work of others to the original source. If you are unsure how to properly cite a source, please consult with me prior to handing in an assignment (and see: [http://www.dartmouth.edu/~writing/sources/](http://www.dartmouth.edu/~writing/sources/)). You should be familiar with Dartmouth’s Honor Principle, which applies to all courses at Dartmouth (available here: [www.dartmouth.edu/~uja/honor/](http://www.dartmouth.edu/~uja/honor/)). I do not expect any violations of this code, but if any concerns do arise I will forward all related materials to Dartmouth’s Committee on Standards.

7. **Before you turn in your papers...** make sure that you use **12-point Times New Roman font,** that you **double-space the whole document,** that your print margins are **1-inch** on all sides (not the default in Word), that all your pages are **numbered,** and that your document is stapled together (if printed). For citations in all papers, you must use APA Style formatting (refer to the APA Style Manual or online guides, such as: [http://owl.english.purdue.edu/owl/resource/560/01/](http://owl.english.purdue.edu/owl/resource/560/01/))
ASSIGNMENTS and ASSESSMENTS

Mid-term examination (20%) – **THURSDAY, OCTOBER 16TH**
- Mix of short answer and fill-in-the-blank questions
- Covers all material up to mid-term (readings, slides, discussions, presentations)

Final examination (20%) – **FRIDAY, NOVEMBER 21ST @ 11:30am**
- Mix of short answer and fill-in-the-blank questions
- Covers all material (emphasis on material since midterm)

Quizzes (15%) – **DATES MARKED ON SYLLABUS**
- Six quizzes throughout the term (average score of best 5 quiz grades)
- Will consist of short answer and fill-in-the-blank questions
- These are intended to be low-stakes opportunities for you and I both to gauge your understanding of the material

Research Paper (15%) – **DUE: TUESDAY, OCTOBER 7TH**
- A well-researched, well-reasoned, 6-page paper relating your given topic to a news article on education or an advertised educational intervention (see assignment on Canvas for more details).
- This is an individual assignment (not a group project), and will be graded as such – you are expected to do your own research and convey your own assessment of the material
- Paper must reference at least 2 new scientific sources (peer-reviewed articles)
- Of critical importance: always cite your sources when you assert a fact

Group Presentation (15%)
- During the first week of class, we will divide into small groups
- During several classes, groups will break out periodically to facilitate discussion or in-class activity, and then we will return to larger group discussion as a class
- Near the end of the term, each group will present a summary and critical analysis of research articles on a given topic, one article per group member:
  - Each roughly 12-minute presentation will include:
    - 2-3 min: A summary of the article, including the goal of the study, an overview of the methods, and a description of the main findings
    - 4-5 min: A critique of whether the authors’ interpretations are well-founded and what are the broader implications of the article
    - 4-5 min: Discussion – the presenter answers questions from the class

Class Participation and Attendance (13%)
- Arrive on time for each class
- Prepare for all class discussions and be attentive (e.g., read the assigned materials, stay awake during class, stay off internet, etc.)
Research Participation (2%)
- The goal of this assignment is to provide you with an insightful perspective on research studies. Please complete one of the following options by Thur., Nov 13th:

**Option #1:**
*Volunteer to participate in lab research in the Education Department (2 hours total)*
Volunteer to participate in one or more research studies conducted by any research lab in the Education Department, totaling *two hours* of participation (e.g., one two-hour study or two one-hour studies). Specific instructions on how to sign up for a research study are posted on Canvas. To get credit, you must hand in a signed *EDUC16 Participant Confirmation Form* (one signed copy for each study in which you participate) to me in class anytime before *Thursday, Nov 13th*. A copy of the form is posted on Canvas.

**Option #2:**
*Write two methods critiques of published research articles (approx. 1 page each)*
If you are unable to participate or uninterested in participating in a research study, you may write an in-depth critique of the methods employed in a published research article. First, locate two empirical articles that were not assigned for this course. Then, for each study, you will write approximately half a page (double-spaced, 12pt font) that explains one aspect of the study procedure that you think the researchers could improve upon without sacrificing the scientific integrity of the study. Be sure to explain why this change is relevant to the authors' conclusions and to how the authors expect the results will *generalize* to other individuals or other situations that were not directly tested. Lastly, on the remainder of the page, briefly describe a research question that builds on the current study but that is not fully addressed by the methods in this article. In other words, given the results of the current study, what is the next question you would like the researchers to address? Describe how this research question follows from the results of the current study and briefly outline the new methods that the researchers could use to address this question. Hand in your overview to me in class anytime before *Thursday, Nov 13th*. Attach a copy of the first page of the empirical article, including the abstract.

You may also combine these two options. If you choose to do so, each 1-page critique is equivalent to 1 hour of research participation.
SCHEDULE
(ASSIGNED READINGS ARE POSTED ON CANVAS)

1. Tuesday, September 16
   INTRODUCTION and COURSE OVERVIEW
   
   ATTENTION AND MEMORY SYSTEMS

2. Thursday, September 18
   NEUROSCIENCE OF LEARNING and MEMORY SYSTEMS
   Readings:

3. Tuesday, September 23
   ATTENTION and WORKING MEMORY
   Readings:

4. Wednesday, September 24 (x-period)
   QUIZ #1
   MULTI-TASKING

5. Thursday, September 25
   NO CLASS TODAY

5. Tuesday, September 30
   COGNITIVE CONTROL and EXECUTIVE FUNCTIONS
   Readings:

6. Thursday, October 2
QUIZ #2,
SELF-REGULATION and GRIT
Readings:

MOTIVATION AND REINFORCEMENT

7. Tuesday, October 7
LEARNING and REINFORCEMENT
Readings:

8. Thursday, October 9
QUIZ #3,
MOTIVATION and PRAISE
9. Tuesday, October 14

GENDER DIFFERENCES IN SCHOOL PERFORMANCE

Readings:

10. Thursday, October 16

**MIDTERM EXAM**

KNOWLEDGE, TRAINING, AND EXPERTISE

11. Tuesday, October 21

MIDTERM REVIEW,
TESTING EFFECT and DISTRIBUTED RETRIEVAL

Readings:

12. Thursday, October 23

QUIZ #4,
REMEMBERING and FORGETTING

Readings:
13. Tuesday, October 28
ORGANIZATION OF KNOWLEDGE and MEMORY
Readings:

14. Thursday, October 30
QUIZ #5,
HOW EXPERIENCE LEADS TO KNOWLEDGE and EXPERTISE

HIGHER-ORDER COGNITION

15. Tuesday, November 4
INTELLIGENCE
Readings:

Thursday, November 6
NO CLASS TODAY
16. Tuesday, November 11
PRESENTATIONS – DAY 1
Readings: TBA, selected by groups

17. Wednesday, November 12 (x-period)
QUIZ #6,
ANALOGICAL REASONING and TRANSFER
Readings:
- Gentner, D., Loewenstein, J. & Thompson, L. (2003). Learning and transfer: A general rule for analogical encoding. Journal of Educational Psychology, 95, 393-405.

18. Thursday, November 13
PRESENTATIONS – DAY 2
Readings: TBA, selected by groups

19. Tuesday, November 18
CREATIVITY
Readings:

Friday, November 21 – FINAL EXAM @ 11:30am
